RDC VIEW

Better Insights. Faster.

Banks and other financial institutions face ever-increasing amounts of data and greater pressure to optimize processes and manage resources more efficiently. It has never been more important to be able to effectively analyze compliance operations, particularly for organizations with complex processes, multiple business lines and territories. The challenge is accessing relevant and timely insights to inform decisions aimed at improving performance.

The window into your customer screening activity

RDC View is a flexible data intelligence and visualization platform. It provides real-time reporting that empowers you to make well-informed decisions that improve the efficiency and effectiveness of your customer screening operation. It has been designed to work seamlessly with our screening solutions and enables you to easily understand your data and extract meaningful insights, with no complex integration procedures or processing costs.

A purpose-built data intelligence solution

The intelligence capabilities of RDC View have been built to meet the specific needs of compliance professionals and answer questions relevant to your organization. Our solution is based on hundreds of hours of customer interviews and feedback, ensuring RDC View can help you:

- **Optimize processes and better manage resources.** Identify trends, track enquiry volumes, spot anomalies and measure performance across multiple business lines and regions. You'll have the right insights to make informed decisions that can streamline your operation.

- **Provide accurate reporting in real time.** Make use of unlimited dashboards and configure them according to the specific reporting needs of individual business lines and regions. Don't just generate more reports, quickly create analyses for other business units or in preparation of audits.

- **Accelerate compliance decision-making.** With greater insight into screening trends and enhanced efficiency across business lines you'll be in a better position to evaluate risk and make confident decisions, faster.

Advanced data visualization
Simplify vast and complex data sets with charts and graphs which provide intelligent insights at a glance.
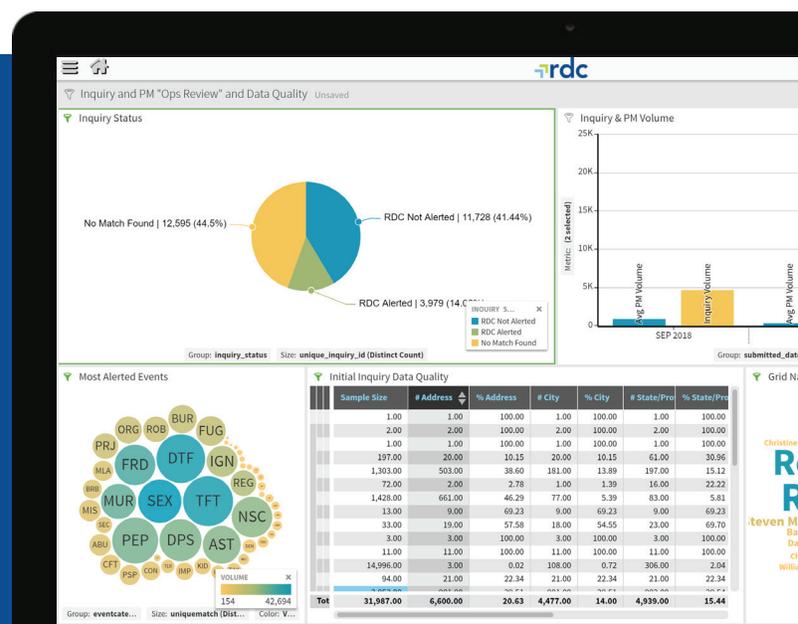

Unlimited dashboards
There is no limit on the number of dashboards you can create for different data sets or business units.
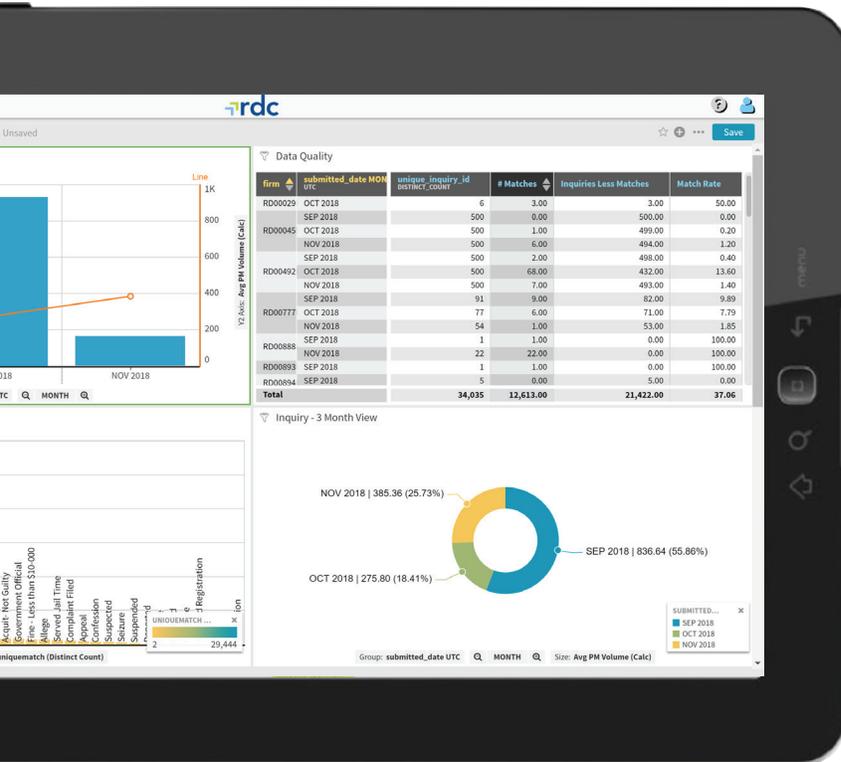

Real-time insights
Build reports quickly and easily with data updated in real time.

Export data
Create reports at the click of a button for management teams and audits.

Delve deeper
Interactive charts make it easy to focus in on specific data.

Compare and contrast
Analyze and compare the same data across regions or business units.

Extract individual charts
Quickly copy an interesting chart into various common applications.
